

MONOCERA NATURAL WAX

WATER BASED PASTE WAX

Line

PROTECTING and POLISHING

Function

PROTECTING and POLISHING. SUITABLE FOR ALL THE SURFACES THAT WANT TO BE POLISHED AND PROTECTED WITH A WAXY FILM

Materials

ANY KIND OF SURFACE EVEN POROUS. EXPRESSLY STUDIED AND FORMULATED FOR MARBLES, GRANITES AND NATURAL AND ARTIFICIAL STONES IT CAN BE APPLIED ALSO ON WOOD AND PLASTIC MATERIALS.

How to use

APPLICATION:

1. Spread a wax layer with a cotton cloth with rotating movement and passing more times on the same points.

2. Verify the wax is spread evenly on the surface.

After few time (1-2 minutes) the white color of the wax has the tendency to disappear (it means the wax is well absorbed by the surface). Wait for another 4-8 minutes for a perfect drying and after polish.

POLISHING:

The best results are obtained by using professional polishing machines (single-brush machine); good results also by using the standard house-polishing machine equipped with polishing felts. On small surfaces the polishing can be made by hand with a cloth

Packaging

400-750ml

Characteristics

EMULSION OF WAXES INTO WATER. COMPLETELY NATURAL PRODUCT WITH VERY HIGH SPREADING DEGREE (the presence of emulsifying agents and water is reduced to the essential minimum)

Important

BEFORE THE APPLICATION ALWAYS EFFECT A PRELIMINARY TEST ON A SMALL, HIDDEN PART OF THE SURFACE. The product CANNOT STAND THE FROST
