

EPOXY TSE

transparent solid epoxy adhesive

Line

EPOXY

Function

Permanent gluing of marbles, granites and natural stones between them or with other supports

Materials

marbles, granites and natural stones

How to use

The epoxy adhesives/glues need exact mixing ratio in weight between the component A (resin) and component B (catalyst). In this particular case: A+B=100:50

Packaging

1.5kg/set □
15 kg/set

Characteristics

HARDENING: 80 – 100 minutes in mass - 200 – 300 minutes in thin layer

Important

The prolonged direct sunlight action can however causes the resin to turn yellow. A PRELIMINARY TEST ON A SMALL, HIDDEN AREA BEFORE THE APPLICATION IS RECOMMENDED
