COTTOFINISH NATURA

WASH-N-WAX FOR TERRACOTTA

Water based wash-n-wax formulated with modified acrylic polymers, waxes, polishing and sanitizing substances. Easy to apply and with a good lastingness, it is extremely flexible and can be used for the most different kinds of material. Once dry, **Cottofinish Natura** gives to the floor an agreeable glossy-satiny effect and particularly decreases the slippery of the treated surface. Works gently without to remove the pre-existing protecting treatments.

FUNCTION

Water based wash-n-wax with light anti-slippery effect.

LINE

COTTO

MAINTENANCE

INDICATION

Suitable for every kind of surface, of low-medium dirt level, to be protected by a waxy layer with a glossy-satiny effect.

MATERIALS

Suitable for **terracotta** and all kind of surface (better if porous): **marble, granite, terrazzo, agglomerates, gres porcelain tiles** etc.

HOW TO USE

It can be used pure as it is or, for frequent application, it can be diluted till 5-10% (0.5-1 liters of Cottofinish and 10 liters of water). Apply with a mop or a clean cotton cloth, wet of product or diluted solution, on the surface to be cleaned scrubbing vigorously the very dirt parts.

Do not rinse. Let the product dry before to walk on the surface.

After drying, the surface can be polished with a simple floor-polisher to obtain a superior gloss. To have the best results, a regular and frequent use of **Cottofinish Natura** is suggested.

TEST

Before the application, it is suggested to effect a preliminary test on a small part of the surface to determine the compatibility of the product with the material to be treated, the consumption and the drying time and, after drying, the aesthetic result and the protecting level effectively performed.

COMPOSITION

Mix of water, surfactants, soaps, waxes, filming and natural derivative substances.

TECHNICAL DATA

The consumptions vary according to the kind of floor and the gloss level required.

STABILITY

The product is an aqueous emulsion: **CANNOT STAND THE FROST**. Do not store at temperature lower than 5°C (41°F) and higher than 35°C (95°F). This condition respected and kept in the original and well closed container, the product is stable at least 1 (one) year.

NOTE

The synergic combination of surfactants and different kinds of wax, allows an easy removal of the dirt and, at the same time, on the surface remains a well sticking and thin, glossy layer .
The same application cleans and polishes and no rinse is needed. After drying, a polishing operation will enhance the gloss of the waxy layer. The polishing can be effected manually or, better, with a common floor-polisher equipped with a soft felt.

IMPORTANT

Cottofinish Natura is environmentally friendly, and has a pleasant floral smell and for these reasons it is widely used in private and public places (hotels, restaurants, communities).

PACKAGING

1 L., 5L., 10 L.

LIMITATION OF LIABILITY

The data provided derive from published information or from our own laboratory tests. The information provided here must be considered as a guideline and not as any form of performance guarantee. Since the application of the product is beyond the control of the manufacturer or supplier, our liability for defective products, when verified, is limited to refund of the purchase price.

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION
